IMPORTANT SAFETY INFORMATION

TO THE OPERATOR

Prior to using the TARCO® WINDY 100, you must be properly trained in the full operation of the machine. This would include but not be limited to a complete review of the operating and safety manual and a complete understanding of all safety procedures including the safety decals and information on the machine. If there is something you do not understand, ask your supervisor to explain it to you. If you require additional manuals or decals, please contact your dealer or the manufacturer.

Make sure all the manufacturers’ protective guards, shields, and screens are in good repair, in place, and securely fastened. Damaged, missing, or weakened safety components can create a hazardous situation for the operator. NEVER remove or modify any safety components on this equipment.

Wear all the protective clothing and personal safety devices issued to you or called for by the job conditions. This may include but is not limited to hard hat, safety shoes, safety glasses or goggles, heavy gloves, hearing protection, reflective clothing or wet weather gear. Remember, you are responsible for your safety and that of your co-workers. Good safety practices protect you and the people around you.

NEVER ride on any part of the equipment or trailer when operating the machine or at any time. Never modify the machine for riders in any way. Prior to operating this machine, be certain that all operators can ride safely in the truck or vehicle being used to trailer the machine. If your machine has been altered to accommodate riders, remove these alterations immediately as this can result in serious injury or death. A “NO RIDERS” decal should be in place. Please request these from your dealer or use the web to contact and request them from Fort Miller FAB3 Corp. (518)-584-4400 or www.fmfab3.com.

A WARNING SYMBOL INDICATES A HAZARDOUS SITUATION WHICH, IF NOT AVOIDED, COULD RESULT IN SERIOUS INJURY OR DEATH

---

**WARNING** – Before starting the engine or applying power to the machine be sure the suction assembly is securely in place over the suction and discharge openings and ready for operation. Make sure all safety interlock switches are properly contacted and in good working order. Make sure the belt guard is properly secured. **NEVER** place any part of your body or clothing near the suction opening, engine, or belt guard. **SERIOUS PERSONAL INJURY COULD RESULT BY NOT FOLLOWING PROPER SAFETY PRECAUTIONS.**

**WARNING** – All safety interlock switches must be tested before each use to ensure interlock switches are in proper working order. Do not operate this machinery if interlock switches are not working correctly. **LOCK THIS MACHINE OUT AND REPAIR OR REPLACE INTERLOCK SWITCH BEFORE USE.** **SERIOUS PERSONAL INJURY OR DEATH COULD RESULT FROM AN IMPROPERLY WORKING SAFETY INTERLOCK SWITCH.**

**WARNING** – Should the machine develop excessive vibration during operation, immediately shut the machine down and do not restart the machine until the cause of the vibration has been identified and corrected. **NOT FOLLOWING THIS PROCEDURE COULD RESULT IN SERIOUS PERSONAL INJURY.**

**WARNING** – Under no circumstances any safety interlock switch be tampered with, bypassed or disabled. Safety interlock switches maintained and in proper working order. **SERIOUS PERSONAL INJURY COULD RESULT FROM IMPROPER SAFETY INTERLOCK SWITCH MAINTENANCE.**

**IMPORTANT SAFETY INFORMATION**

⚠️ WARNING – Never disconnect any suction assembly or get near the suction case inlet opening without first completely stopping the suction impeller and shutting down and positively locking out the power source. **NOT FOLLOWING THESE PROCEDURES COULD RESULT IN SERIOUS PERSONAL INJURY.**

⚠️ WARNING – Never inspect or preform maintenance on the suction impeller without first shutting down and positively locking out the power source and be sure the suction impeller has completely stopped rotating. **NOT FOLLOWING THESE PROCEDURES COULD RESULT IN SERIOUS PERSONAL INJURY.**

⚠️ WARNING – Keep hands and feet away from the suction shroud opening and the leaf ingester mechanism at all times. Be sure the power source is shut down, positively locked out, and the impeller has completely stopped rotating before inspecting the suction shroud or leaf ingester mechanism. **NOT FOLLOWING THESE PROCEDURES COULD RESULT IN SERIOUS PERSONAL INJURY.**

⚠️ WARNING – Personnel operating this equipment should wear ear and eye protection at all times. This equipment produces high decibel noise which could damage hearing over long term exposure. As with any piece of equipment of this nature, eye protection should always be worn to protect against flying debris. **NOT FOLLOWING THESE PROCEDURES COULD RESULT IN SERIOUS PERSONAL INJURY.**

⚠️ WARNING – For all machines equipped with a hydraulically operated dumping leaf box the following procedures must be followed. No personnel is permitted on top of the machine. Machines equipped with top screening cannot support the weight of a person. Also, OSHA does not permit a person at an elevated height without the use of fall protection equipment. Prior to dumping the load it is imperative that the suction impeller has come to a complete stop. The operator(s) must be sure the machine will clear all overhead obstructions (power lines, tree limbs, etc.) prior to dumping. **NOT FOLLOWING THESE PROCEDURES COULD RESULT IN SERIOUS PERSONAL INJURY OR DEATH.**
